

We design and produce **SAFE, INTELLIGENT** and **AUTOMATIC** flood protections

Custom designed, these flood barriers can be **perfectly camouflaged** with any flooring, **take up very little space**, are always ready to operate, require no special maintenance and **are operated**, through a patented system, **by a lifting balloon inflated by air or by water**, absolutely ecological and ecofriendly.

ANTI-FLOODING BARRIERS to protect any Environment:

Residential buildings / Commercial and production activities / Garages / Wherever there are problems of flooding

HAB Barriers: the definitive solution to any FLOOD PROBLEM

Since 1997 we have produced automatic **ANTI-FLOODING SYSTEMS**, true invisible Barriers that only come into action in the presence of water, without the need for any operator intervention.

Our Barriers represent a safe and definitive solution for **FLOOD PREVENTION**, never constituting architectural barriers, minimizing the environmental impact and respecting the architecture of any building.

HYDRO AIR BANK

Over Limits Water Management Technologies

AUTOMATIC FLOOD BARRIERS

HIGH PROTECTION and RELIABILITY:

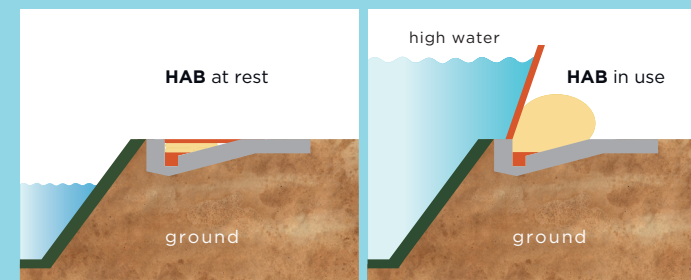

ARE YOU OUT OF HOME? Are you sleeping?
The barrier rises even if no action is taken

IS THERE NO ELECTRIC CURRENT?
The barrier works even if there is no electricity!

IS THE EMERGENCY OVER?
The Barrier is lowered even without you!

HOW ANTI-FLOOD BARRIERS WORK

ONLY ADVANTAGES:

- fully automatic
- zero environmental impact
- zero architectural impact
- ecofriendly, pneumatic and or hydraulic
- it's laid with minimal civil works
- doesn't interfere with other systems
- only one day for assembly
- customizable external finish
- soil settlements don't interfere with it
- it always works even in the absence of electricity
